

Please put an end to the absurd claim that SBC has patent rights to web pages using frames and/or tabs to aid in site navigation. I have been conducting a very small web site development and maintenance business for the last 4 to 5 years and this will definitely put me out of business. You can read SBC's claim and licensing fees here: <http://www2.museumtour.com/sbc.html>

Thank you for your attention,

Gary Terrell
